

Asbestos compliance

The Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA) requires that each year district workers and building occupants receive notification about asbestos activities such as response actions and inspections. The purpose of this correspondence is to meet those requirements and familiarize you with the asbestos-related activities that have been conducted in Davison during the past year.

Management Plans - The existing Management Plans are located in the Main Office of each building and are available for review. A copy of each Management Plan is also located at the District's Operations Office, 1490 N. Oak Road, Davison, Michigan.

Periodic Surveillance - The AHERA regulation requires surveillance of the condition of asbestos containing materials every six months. This monitoring is being conducted as required by the asbestos standard and copies are located in the management plans.

Reinspection - The AHERA regulation requires a three-year reinspection of the condition of asbestos containing materials in all school buildings. This monitoring is being conducted by State of Michigan accredited asbestos inspectors and copies are located in the management plans.

All asbestos abatement records are located in the management plans and available for public review.
