

## **Pest control notice**

The Davison Community Schools in keeping with the State of Michigan Natural Resources and Environmental Protection Act 451 of 1994 and Regulation 637 has adopted a plan of action for controlling insects, rodents and various other pests in and around our facilities.

The district's plan of action for controlling pests incorporates integrated pest management (IPM). IPM utilizes various means of pest control, including, but not limited to, habitat modification and sanitation, mechanical control, biological control and chemical control.

Use of chemicals to control or eliminate pests will be closely monitored and applied only as a last means of resort. Safety Data Sheets (SDS) for all pesticides used are available by calling Caitlin Bentoski in the district's Business Offices at (810) 591-0803.

If you wish to be notified before a scheduled pest treatment, please submit your request in writing to Phil Thom, Director of Operations, Davison Community Schools, 1490 N. Oak Road, Davison, MI 48423.

All requests shall include a parent or guardian's name, address, day and evening telephone numbers, email address (if available), name of student(s) and school(s).

If you have any questions regarding this notice, please contact Phil Thom at (810) 591-1050.

There may be occasions where pesticides may be applied in an emergency situation without prior notification to parents or guardians. In this case, parents or guardians requesting notification will be notified immediately following the application.
