

8510 - WELLNESS

As required by law, the Board of Education establishes the following wellness policy for the Davison Community School District.

The Board recognizes that good nutrition and regular physical activity affect the health and well-being of the District's students. Furthermore, research concludes that there is a positive correlation between a student's health and well-being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

The Board, however, believes this effort to support the students' development of healthy behaviors and habits with regard to eating and exercise cannot be accomplished by the schools alone. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Superintendent shall appoint a District wellness committee that includes parents, students, representatives of the school food authority, educational staff (including physical education teachers), school health professionals, members of the public and school administrators to oversee development, implementation, evaluation and periodic update of the wellness policy. The Wellness Committee shall be an ad hoc committee with members recruited and chosen annually.

The Wellness Committee shall be responsible for:

- A. assessment of the current school environment;
- B. review of the District's wellness policy;
- C. presentation of the wellness policy to the school board for approval;
- D. measurement of the implementation of the policy;
- E. recommendation for the revision of the policy, as necessary.

Before the end of each school year the Wellness Committee shall recommend to the Superintendent any revisions to the policy it deems necessary and/or appropriate. In its review, the Wellness Committee shall consider evidence-based strategies in determining its recommendations.

The Superintendent shall report annually to the Board on the progress of the Wellness Committee and on its evaluation of policy implementation and areas for improvement, including status of compliance by individual schools and progress made in attaining goals of policy.

The District shall assess the Wellness Policy at least once every three (3) years on the extent to which schools in the District are in compliance with the District policy, the extent to which the District policy compares to model wellness policies, and the progress made in attaining the goals of the District Wellness Policy. The assessment shall be made available to the public on the School District's web site.
