The first amendment protects the rights of a free press 2. The ways first amendment laws protect journalists 3. The ways copy write laws protect broadcast materials 4. Fair use laws allow for limited use of some copy written materials 	<p>Skills/Processes Students will be able to . . .</p> <ol style="list-style-type: none"> 1. Understand why the first amendment protects Freedom of the press 2. Apply the first amendment right to journalistic situations 3. Know what materials can and cannot be used in DTV creations 	

DTV

Students will understand all the steps in planning for a television production. Students will be able to site plan, chose and ready equipment, story board, script, and plan for different types of productions: Studio, Field, and story planning

Unit VII: Production Planning

Essential Questions:

1. What are the types of productions?
2. How to chose locations and people for productions?
3. How to choose correct equipment for Productions?
4. How to plan for different types of productions?

Essential Understandings:

1. The types of productions performed in DTV: Studio, Field and story.
2. Choosing a location is an important step in production planning
3. The equipment need to perform each type of production
4. The planning process, brainstorming, storyboarding, scripting, location and equipment selection.

Curriculum Standards: Skills/Benchmarks

- Select format and tone based on desired effect.
- Demonstrate set-up and striking equipment, as specified by a production design.
- Use technology tools to produce polished written and multimedia work.
- Participate as members of a work group.
- Recognize the role of research as a contribution to collective knowledge
- Respond to feedback to strengthen written and multimedia presentation.

Knowledge/Content Students will know . . .

1. The different types of productions they will complete
2. How to determine the correct location and subjects for productions
3. The correct equipment needed to complete each production
4. The DTV planning process from beginning to end

Skills/Processes Students will be able to . . .

1. Set up and production plan using storyboards, scripts, equipment sheets, and sign out procedures
2. Chose proper equipment for a chosen production
3. Use contact sheets and find contact information to chose subjects for production
4. Use proper channels and professional conduct to contact people involved in the production process.

DTV

Students will understand the basic techniques and operations of a live television production. They will understand and perform the correct set up procedures as well as carry out the the production of live television shows.

Unit VIII: Production Operations and Techniques

Essential Questions:

1. What steps are involved in setting up a live DTV production?
2. What is the physical process of setting up the production?
3. What Television personnel are required for a production?
4. What is the role of each person involved in a live television broadcast?

Essential Understandings:

1. The set up and on air procedures and techniques of live television.
2. How to set up for a live television event.
3. The personnel involved in creating a live television production.
4. The roles of those involved in a live television production
5. The hand on experience of working in a live television environment.

Curriculum Standards: Skills/Benchmarks

- Participate collaboratively and productively in groups fulfilling roles and responsibilities.
- Demonstrate set-up and striking equipment, as specified by a production design.
- Understand the implications and potential consequences of language use.
- Prepare spoken and multimedia presentations that effectively address audiences by careful use of voice, pacing, gestures, eye contact, visual aids, audio and video technology
- Apply and adapt a variety of appropriate strategies to solve problems
- Participate as members of a work group

Knowledge/Content Students will know . . .

1. How to set up for a live television production.
2. The set up procedures for cameras, cables, audio, graphics, tapes, director, producer.
3. The roles of the personnel involved in a live production.
4. How to run a actual on air live production.

Skills/Processes Students will be able to . . .

1. String cables set up cameras, set up audio, Graphics, and tape play back and record.
2. How to perform the duties of personnel during a live production.
3. Set up a live television production, from planning, to checks, to on air production, and break down procedures.

DTV

Students will understand how to develop and create a news story, sports story or psa.

Unit IX: Studio Production/Story Production

Essential Questions:

1. What are the different types of stories used in DTV?
2. What is the process for creating a story in DTV?
3. What are the procedures to follow while creating a story?
4. What are the correct procedures to follow after a story is complete?
5. What are the ways to research, plan and brainstorm stories?

Essential Understandings:

1. The types of stories used in DTV are News story, Feature story, PSA, and Sports.
2. All the policies and procedures in creating stories
3. The correct procedures to follow after a story is completed
4. How to research and plan a story

Curriculum Standards: Skills/Benchmarks

- Determine the meaning of unfamiliar words, and specialized vocabulary.
- Recognize the conventions of visual and multimedia presentations and how they carry or influence messages.
- Apply and adapt a variety of appropriate strategies to solve problems
- Participate as members of a work group

Knowledge/Content Students will know . . .

1. How to identify different types of stories
2. The processes involved in the story creation process
3. How to prep and correctly set up a story as a reporter.
4. The research process in developing a story

Skills/Processes

Students will be able to . . .

1. Identify different types of stories
2. Fill out correct paperwork for DTV story process
3. Plan and research and brainstorm story ideas
4. Work with all DTV procedures and understand their purpose

DTV

Students will understand and be able demonstrate the process of (EN6) Electronic News Gathering out in the field.

Unit X: Field Production

Essential Questions:

1. What are the basic functions of a video camera?
2. How do I properly prepare a camera before recording?
3. How do I operate a camera in the field?
4. What are the proper ways to record video for editing purposes?
5. What are the steps involved in recording Audio?

Essential Understandings:

1. The basic functions of a video camera, and how to properly operate them.
2. The functions that must be completed before recording any video.
3. The correct way to operate a camera in the field.
4. To shoot video like professionals, not just point and shoot.
5. To record audio correctly and use microphones

Curriculum Standards: Skills/Benchmarks

- Determine the meaning of unfamiliar words, and specialized vocabulary.
- Recognize the conventions of visual and multimedia presentations and how they carry or influence messages.
- Apply and adapt a variety of appropriate strategies to solve problems
- Participate as members of a work group

Knowledge/Content Students will know . . .

1. How to operate a camera on a professional level.
2. How to shoot video for editing purposes.
3. How to collect audio for interviews and as natural sound.
4. How a camera operates and the functions it performs

Skills/Processes

Students will be able to . . .

1. Camera Functions: White Balance, Filters, Iris, Recording.
2. Video/Audio inputs and outputs
3. Setting an audio Level, Mic Selection, Interviews, Nat Sound.
4. Video concepts: Shot selection, Framing, Depth of Field, Tripods,
5. Perform EnG tasks for a news operation.

DTV

Students will understand How to edit video and audio using linear and non-linear methods. They will understand the ability and power of editing to tell a story and deliver a message.

Unit XI: Audio/Video Editing

Essential Questions:

1. What are the two kinds of editing?
2. What is the relationship between shooting and editing video?
3. How can editing techniques be used to enhance or distort a message?
4. What are the steps involved in editing a project?

Essential Understandings:

1. The difference between Linear and non-linear editing.
2. How editing begins in the camera.
3. How to correctly edit video and audio on a non-linear system.
4. The power of editing and changing video and audio, and the ethics involved with it.
5. The correct procedures for editing a project in DTV.

Curriculum Standards: Skills/Benchmarks

- Read texts to acquire new information (1)
- Operate audio recording and editing equipment
- Edit stories
- Demonstrate ethical behavior in writing or speaking , related to presenting information to the public

Knowledge/Content
Students will know

1. The different types of editing systems.
2. How to edit a project.
3. The power and ethics of editing.
4. The correct procedures for editing.

Skills/Processes
Students will be able to

1. Edit on a linear and non linear editor
2. Complete all of the functions of editing: shooting, import, export, edit on timeline, effects and transitions, ect.
3. The ethics behind editing video.
4. Edit a complete project for airing on DTV

DTV

Students will understand how graphics and special effects can be used to enhance a television production. The will identify the different types of graphics and when they should be used, Studnets will also be able to crate,update,can place graphics on air during a live and edited production using both the Chyron system and Adboe Premiere editing software.

Unit XII: Effects and Graphics

Essential Questions:

1. How can graphics be used to enhance a production?
2. What are the different types of graphics, when should they be used?
3. What are the techniques and equipment used to create graphics for programs?
4. How do I operate graphics machines for creation and on air production?

Essential Understandings:

1. That graphics are an essential part of television, and can be used to enhance information, or enjoyment of a production.
2. The correct graphics to use and the correct times to use them.
3. How to create graphics and how to place them on air or into an edited piece.
4. How to operate the Chyron system and operate graphics in Adobe editing system.

Knowledge/Content Students will know . . .

- Control Standard English structures in a variety of contexts using language carefully and precisely.
- Proofread to check spelling, layout, and font and prepare selected pieces for a public audience.
- Use sentence structures and vocabulary effectively within different modes and for various rhetorical purposes.

Skills/Processes Students will be able to . . .

1. Editing in Chyron
2. Editing graphics in Adobe.
3. The ability to create and select graphics that are appropriate for production.
4. Operating and creating graphics during a live production using the

- Demonstrate use of conventions of grammar, usage, mechanics in written texts, including parts of speech, sentence structure, and variety, spelling, capitalization, and punctuation.

Chyron system.
